Remediation & Recommendations:

Student Signature _____

Attending Signature _____

Explanation Sheet & Definitions

This form is used to obtain a more in depth analysis of the student's performance during their rotation. This diary along with their end of service exam and your evaluation will determine the student's final grade. Please review the form and sign where indicated verifying the accuracy of the content. Please feel free to make any comments you wish in the space provided and any recommendations for further training.

You will note that several evaluation methods or "metrics" are listed. You may have used several or all of these methods. Please indicate the methods used.

Definitions:

- A) MCQ-- Multiple Choice Question

- B) 360 evaluations – Student is evaluated by their superiors (Attendings, Resident, interns) their fellow students and their subordinates (nursing, patients)
- C) Chart Stimulated Recall—Any evaluation of the students ability to communicate case information from a patients file (during an M&M conference, Teaching Rounds)
- D) Global Evaluation --- An end of rotation evaluation sheet filled out by the attending commenting on all core competencies
- E) OSCE—Observed Structural Clinical Exam—One or more assessment tools are administered in separate standardized patient encounters
- F) Logs—listing either patients cared for by diagnosis or procedures assisted in or performed
- G) Patient Survey—Questionnaire filled out by the patient on the students competencies
